## DETAILED ACTION

### *Status of Claims*

1. This action is responsive to amendment filed on August 28, 2007, where applicant amended claims 1,4,5,11-13 and canceled claim 2. Claims 1,3-15 are pending.

### *Drawings*

2. The drawings were received on 4/24/2007. These replacement drawings are acceptable.

## EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donna Mason (reg 45962) on September 19, 2007.

The application has been amended as follows:

**Claim 1 (Amended): PLEASE SEE ATTACHED SHEET**

**Claim 3 (Amended):** The network storage system according to claim 2 1,

**Claim 5 (Amended):** The network storage system according to claim 2 1,

**Claim 7 (Amended):** The network storage system according to claim 2 1,

**Claim 8 (Amended):** The network storage system according to claim 2 1,

**Claim 10 (Amended):** The network storage system according to claim 2 1,

*Allowable Subject Matter*

4. Claims 1,3-15 are allowed.
5. The following is an examiner's statement of reasons for allowance: Applicants invention of a network storage system for supplying a storage to a plurality of clients, is found to be patentable. Prior art references found to be pertinent to Applicants disclosure (particularly Patent Numbers: 6,718,372, 6,961,836, 6,944,712, 7,103,665, and 7,136,883), either only teach minor aspects of the invention or only teach the general environment of the invention. The prior art, neither singly or in combination, do not teach the claim limitations.

The particular novel feature of the invention (as mentioned in the claims) is how the second device manages a connection between a plurality of clients and a first device that is provided with a disk device, and relays access requests from the clients to the disk device. This is done by the first device allocating a portion of the disk device to the second device. The second device then divides that allocated portion into further plurality of portions and it will allocate each of the plurality of portions to clients. When the second device receives an access request the second device performs address translation of each of the clients associated with each request, adds a preset name of the portion allocated by the first device to a file name included in the access request and transfers it to the first device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
